Subject: Re: wild flower consideration

Greetings Joanna;

During a recent evaluation in the common area at Wildflower we noticed the firewood at most units seemed unattractive.

I would like to offer the following plan. SRLP will supply a 8' wood rack capable of holding a ½ cord of dry wood. The rack would be placed on the undercover side of the front door. The rack would be filled with seasoned dry firewood. Next a grill tray placed under the BBQ will protect the desk and keep the area cleaner. If the board already has a wood storage plan in place please let me know. If not In an effort to beat the weather I would like consideration from the board ASAP

the wood rack is 95x49x14

the tray is 41x26
